Yes, for yours and Rick's particular situation, more time is still okay. I didn't want to mention it in the email and then have everyone else come back and ask for more time, in the interest of keeping to our timeline.

Thanks,

Claudia

Hi Claudia –

Still having some issues with others' markups being attributed to me, but pretty minor for the most part. Also, I'm assuming that we can have a few extra days past Friday for legal comments — does that still work for you?

Importance: High

Hi, U&O FIP Team,

Hope you had a fun Halloween weekend. This is just a friendly reminder that we have requested comments in the SharePoint site on the draft Federal Register notice (on the Regulatory Documents page) and the technical support document (on the Technical Support Documents page) by **COB this Friday, November 6, 2015**.

Hopefully everyone got the message to disregard my initial instructions and to edit the documents in the full version of Word, rather than Word Online, so that the track changes feature is available. If you have any issues doing that let me know, but from what I have heard so far, it has been working fairly smoothly.

Happy reading and our many thanks to you for your input!

Claudia
